Service Letter No. 482

September 20, 1966

**SUBJECT:** Removal of 25,000 ft. Altitude Limitation

**MODELS AFFECTED:** PA-23-250, PA-E23-250 Aztecs (Turbocharger only) Serial Nos. 27-2505 to 27-3458 incl.

We have been advised by the AiResearch Aviation Service Company that turbo-charged Aztecs may have the 25,000 ft. altitude limitations placard removed and replaced with a new placard stating "Above 21,000 ft. reduce VNE speed 5 MPH per 1,000 ft." It will also be required that a revised flight manual supplement denoting this change be incorporated in the aircraft paperwork.

Kit 757 063 contains the new placard and the revised flight manual supplement and is available through your Piper distributor at a suggested retail price of \$2.25\*\*.

**PIPER AIRCRAFT CORPORATION, LOCK HAVEN, PA.. U. S. A.**
