VENDOR SERVICE PUBLICATIONS

TO: All Piper Distributors, Service Distributors, Factory Direct Dealers and Piper Field Service Facilities.

SUBJECT: Bendix/King Installation Bulletins No. 250 and No. 260.

PURPOSE: To distribute the attached Bendix/King Installation Bulletins No. 250 and No. 260 to all Piper Distributors, Service Distributors, Factory Direct Dealers and Piper Field Service Facilities.

The attached Bendix/King Installation Bulletins may affect King Radio Equipment installed in Piper airplanes. Refer to the publications for specific details.

Installation Bulletin

BENDIX/KING

GENERAL AVIATION AVIONICS DIVISION

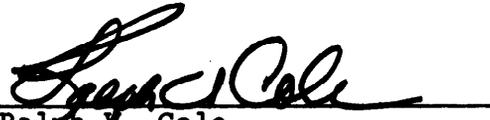

BULLETIN NO: 250 Revised
APPLICABLE TO: KAP 100, KAP 150 and KFC 150
Flight Control Systems

This installation bulletin is approved for incorporation in the following aircraft:

Mooney M20J and M20K	SA1561CE-D
Piper PA-28-161, PA-28-181, PA-28-236	SA1565CE-D
Piper PA-28RT-201, PA-28RT-201T	SA1563CE-D
Piper PA-32-301, PA-32-301T	SA1567CE-D
Piper 32R-301, PA-32R-301T	SA1572CE-D
Piper 34-200T, PA-34-220T	SA1575CE-D
Piper PA-46-310P	SA1778CE-D
Piper PA-60-700P	SA1777CE-D
Cessna 172P	SA1570CE-D
Cessna 172RG	SA1568CE-D
Cessna 182P, 182Q, 182R, T182	SA1770CE-D
Cessna R182, TR182	SA1571CE-D
Cessna A185F	SA1573CE-D
Cessna U206G, TU206G	SA1569CE-D
Cessna 210R, T210R	SA2050CE-D
Cessna 208	SA2053CE-D
Beech A36 (s/n E1241 and after), A36TC, B36TC	SA1574CE-D
Beech F33A	SA1789CE-D
Aerospatale Socata Trinidad TB 20, TB 10	SA1785CE-D
Partenavia AP68TP 300	SA1784CE-D
Partenavia P68C, P68C-TC	SA1791CE-D

FAA Approved

Ralph V. Cole
Coordinator DAS4CE

SUBJECT: Authorizing use of approved, replacement King part number KG 258 Attitude Horizon and KI 256 Flight Command Indicators with updated KC 190, KC 191 and KC 192 Flight Computers in existing Flight Control installations.

Date: April 12, 1985
Rev. 2, July 12, 1987
KPN 600-9250-02

IB #250 Revised

Page 1 of 3

King Radio had revised the KG 258, KI 256 and KC 19X series Flight Computers to improve their interface capability with each other. The improvement consisted of isolation amplifiers added to the pitch and roll attitude outputs in the gyros and circuitry added to the Flight Computer gyro excitation power supply for more precise regulating of gyro excitation out of the computer.

Subsequent to the introduction of these units, King Radio determined that no appreciable benefit was achieved from the addition of these amplifiers and the units listed below are no longer produced.

The KG 258 units with this change are identified by the 060-0020-21, 22, 23, 24, 27, 28, 29 and 30 King part numbers. These units are defined as:

060-0020-21	zero degree, with both pick offs and knob adjustment, interchanges with	060-0020-01
060-0020-22	eight degrees, with both pick offs and knob adjustment, interchanges with	060-0020-02
060-0020-23	zero degree, with roll pick off only and knob adjustment, interchanges with	060-0020-03
060-0020-24	eight degrees, with roll pick off only and knob adjustment, interchanges with	060-0020-04
060-0020-27	zero degree, with both pick offs and screw adjustment, interchanges with	060-0020-07
060-0020-28	eight degrees, with both pick offs and screw adjustment, interchanges with	060-0020-08
060-0020-29	zero degree, with roll pick off only and screw adjustment, interchanges with	060-0020-09
060-0020-30	eight degree, with roll pick off only and screw adjustment, interchanges with	060-0020-10

To utilize these part number KG 258, a wiring change would be incorporated in the KAP 100 and KAP 150 Autopilot Systems. Three (3) wires must be added between the KC 190 or KC 191 and the KG 258. The wires are:

+15 VDC from P19X2-F to P2581-J
-15 VDC from P19X2-E to P2581-K
Signal Ground from P19X2-A to P2581-N

Date: April 12, 1985
Rev. 2, July 12, 1987
KPN 600-9250-02

IB #250 Revised

Page 2 of 3

These wires supply power and ground for the roll and pitch amplifiers. These flavors of KG 258's will not provide gyro reference information for the autopilot unless the wires are added to the installation.

The KI 256 revision was indicated by Mod 6. Changes to the installation were not required because the wires supplying +15 volt power and ground were already installed. Mod 6 has been superceded by Mod 7.

The updated Flight Computers are noted by Mod 8. There were no changes required in the installation for the modified computers.

No changes were required to a KFC 150 System to incorporate these units but a KAP 100 or KAP 150 System required adding three (3) wires between the Flight Computer and KG 258.

These changes constituted a product improvement and were not warranty reimbursable. This installation bulletin will remain in effect and will be considered authorization to use the different part number KG 258 Attitude Horizons in existing installations.

For optimum performance, a gyro alignment is required anytime an attitude gyro or flight control computer is replaced or serviced. Refer to the applicable installation or flightline maintenance manual for procedures.

 FAA DER KC-249
 Coordinator DAS4CE

SUBJECT: Authorizing use of recently approved King part number
 KG 258 Attitude Horizons in EXISTING KFC 200 AUTOPILOT
 ONLY (KAP 200) Flight Control installations.

King Radio revised the KG 258 to improve its interface capability with some autopilot computers. These improvements consisted of additional isolation amplifiers in the pitch and roll attitude outputs in the gyro. This change required new part number designations.

Subsequent to the introduction of these units, King Radio determined that no appreciable benefit was achieved from the addition of these amplifiers, and the units listed below are no longer produced.

The KG 258 units with this change, that are useable in the KFC 200 Autopilot only, are identified by the 060-0020-21, -22, -27 and -28 King part numbers. These units are defined as:

Date: April 18, 1986
 Rev. 1, July 12, 1987
 KPN 600-9260-01

IB #260 Revised

Page 2 of 3

060-0020-21	zero degree, with both pick offs and knob adjustment, replace by	060-0020-01
060-0020-22	eight degree, with both pick offs and knob adjustment, replace by	060-0020-02
060-0020-27	zero degree, with both pick offs and screw adjustment, replace by	060-0020-07
060-0020-28	eight degree, with both pick offs and screw adjustment, replace by	060-0020-08

This installation bulletin will be considered authorization to use the different part number KG 258 in existing installations. The new part number KG 258 is not recommended for new or replacement installations since the original KPN 060-0020-01, -02, -07 and -08 KG 258 Attitude Horizons are direct replacements in existing installations.

For optimum performance, a gyro alignment is required anytime an attitude gyro of flight control computer is replaced or serviced. Refer to the applicable installation or flightline maintenance manual for procedures.
